

Critical Thinking in Cardiology

A New DCB Academy Endeavor

-Project overview and goals

Lessons are designed to provide a platform for in-depth discussions on the most complex real-world cases and current debatable topics in the field of cardiology. These discussions will involve the use of critical thinking frameworks by highly experienced physicians from all over the world to analyze the latest developments and controversies and to provide the best possible diagnostic, therapeutic, and prognostic approaches to the cardiology issues that are currently under discussion globally. The goal is to use critical thinking skills to investigate these issues and ultimately advance the field of cardiology.
